

### College launches £3.2m Clean Energy Education Hub

Redcar & Cleveland College have opened the doors to its Clean Energy Education Hub, part of a recent £6.5m investment in college facilities.

“We are incredibly proud to deliver this outstanding new facility that responds to the exciting clean energy employment opportunities across the Tees Valley,” said Redcar and Cleveland College principal, Jason Faulkner.

The college has worked in collaboration with Redcar & Cleveland Borough Council and industry

giants, including BP and Northern Gas Networks, who stepped up to help shape plans.

The Clean Energy Education Hub has received a capital injection of £2.4m from Redcar Town Deal, as one of its flagship projects to improve and develop Redcar.

## Important notice to subscribers

In our last 'Business Bulletin', we included an article about a request for confirmation that you wish to continue receiving e-newsletter communications from us. This is due to a review and update of our Privacy Policy and Retention Period.

If you wish to continue to receive our e-newsletter ***and have not already confirmed this with us via email***, please respond to this email to confirm that you want to remain on our mailing list.

Our e-newsletters are one of the main ways that we engage with and send information to the Redcar and Cleveland business community. We send information via e-newsletter on the following type of activities, which could benefit your business:

- **Funding opportunities** – including those coming from major projects and Government sources, such as the Levelling Up Fund and Redcar Town Deal
- **Business events**
- **Support programmes**
- **Good news stories**
- **Other opportunities for your business**

We hope to 'keep you on board', but going forward, we will include a periodic feature in our 'Business Bulletin' to outline how to unsubscribe from our e-newsletters.

Kind regards

Business Redcar | Cleveland team

## Materials Processing Institute launches venture arm to commercialise innovation

The South Bank based Materials Processing Institute has launched a new venture arm to generate additional investment to expand its research across the foundation industries.

Potential areas for commercialisation include the reduction of iron oxides using hydrogen, recovery of critical materials, including lithium, from used batteries, reducing nitrogen levels in steelmaking, and advances in powder metallurgy.

**EVENT NOTICE: Cleveland  
Institution of Engineers:  
Balancing Resource  
Efficiency and Climate  
Change**

**Date:** Tuesday 23rd May

**Time:** 6.00pm – 7.30pm

**Venue:** Materials Processing Institute, Eston Road, Middlesbrough, TS6 6US

Join the Cleveland Institution of Engineers for their May lecture with Dr Graham Hillier at the Materials Processing Institute.

In this talk, Dr Hillier will look at the role that resource efficiency has to play in the reduction of carbon emissions and limiting the impact of climate change. Discussing how new technology can only be a part of the solution for a more sustainable future and looks at the impact we can have through better application of existing approaches. Finishing by looking into how changes in behaviour and approaches to system design can reduce the impact we have on the environment.

Register to attend this event in person by contacting [cieevents@iom3.org](mailto:cieevents@iom3.org).

Please go here: <https://www.mpiuk.com/contact-us.htm> for directions, when you arrive, please use the entrance marked "Fitzgerald Suite".

If you cannot make the lecture in person, there will be a live stream made available via webex.

To register for the live stream, please click here ([Webex space for CIE - Webex](#))

## Introducing Micropore's LabYak video series

Micropore Technologies is sponsoring a brand new video series where life sciences expert Steve Bagshaw interviews fellow scientists to learn more about what today's pioneers in the laboratory are currently excited about.

There are currently 6 episodes available to view in the series so far and you can sign up to the LabYak YouTube channel to receive notification as soon as future episodes are published.

To view the video series and to subscribe visit LabYak's YouTube channel here

**Date:** Wednesday 7th June

**Time:** 08:00am – 10:30am

**Venue:** Prior Pursglove College, Adult Skills Centre, Guisborough, TS14 6BU

Supported Internships are a fantastic way for employers to develop their own in-house talent and recruit young people who are committed to their organisation.

These internships offer a work-based study programme for young people (16 to 24 years) with special educational needs and disabilities (SEND) that can help kickstart their career, and they are an extremely successful route into permanent employment.

Prior Pursglove College has been successfully running supported internships for several years, and these are also delivered by Redcar and Cleveland College and Project Choice alongside employer partners across the Borough.

Book your place here (<https://www.eventbrite.com/e/supported-internship-business-breakfast-tickets-621682859167>)

## **Redcar | Cleveland Ambassadors event: Clean Energy Education Hub**

**Date:** Tuesday, 23 May

**Time:** 8:00am-9:30am

**Venue:** Redcar & Cleveland College, Corporation Road, Redcar

The brand new 'Clean Energy Education Hub' is a fantastic new facility for Redcar and Cleveland.

At the event you will hear from speakers who have been involved in the development of the new Hub and its activities going forward. Attendees will then get an exclusive tour of the facility. Time will also be allocated for networking, over breakfast refreshments, so you'll get chance to catch up with your ambassador colleagues!

The £3.2M hub at Redcar & Cleveland College will train students for careers in our growing green industries - so that they can directly benefit from jobs being created on our doorstep.

£2.4M for the project has come from the Government's Town Deal fund. Darren Winter, chair of the Redcar Town Deal Board, said of the project: "On behalf of the Town Deal Board, I am delighted that funds from the Town Deal has supported the build of the Clean Energy Education Hub, helping young people in their careers."

To book your place at the event, please register here (<https://www.eventbrite.co.uk/e/talk-tour-new-clean-energy-education-hub-at-redcar-cleveland-college-tickets-603492882457>)
