Cyclist and pedestrian safety is an important issue for drivers in Redcar and Cleveland, UK, as the region is home to a number of cycling and walking routes, as well as a busy road network. To promote cyclist and pedestrian safety, it is important for drivers to be aware of the rights and needs of these road users, and to take steps to ensure their safety.

First and foremost, drivers should always be on the lookout for [pedestrians and cyclists](#), and be prepared to yield to them when necessary. This includes paying attention to crosswalks and intersections, and being especially vigilant when turning or changing lanes. Drivers should also be mindful of the speed limit and avoid speeding, as this can greatly increase the risk of accidents involving pedestrians and cyclists.

In addition, drivers should be aware of the presence of cycling and pedestrian infrastructure, such as [bike lanes](#) and sidewalks, and respect these designated areas. When driving near cyclists, drivers should allow at least a three-foot buffer between their vehicle and the cyclist to ensure their safety.

Finally, it is important for drivers to be courteous and patient when sharing the road with pedestrians and cyclists. This includes avoiding aggressive or reckless behavior, such as honking the horn or tailgating, and giving pedestrians and cyclists the space they need to safely navigate the road.

Overall, by following these safety tips and showing consideration for pedestrians and cyclists, drivers in Redcar and Cleveland can help to create a safer and more pleasant environment for everyone on the road.
